

We will be doing a VERSO release on **Thursday, June 13, 2024, beginning a little after 7:00pm Pacific (10:00pm Eastern)**. Downtime is usually about 15 minutes but may be longer if issues come up.

**RESOLVED**

<b>AG-3148</b>	On the Your Account > Items on Hold Screen, bibliographic data containing diacritics was not displaying correctly. This is resolved.

**IMPROVED**

**Add Additional Subfields to Subject Search**

The Subject Search index has been enhanced to include additional subject access points from MARC records, improving search results for individuals with numeration in their names.

**Auto-Focus on Simple Search Removed as the Default**

VERSO had several pages where the cursor automatically focused on the Simple Search bar. This default behavior has been removed to enhance 508 compliance as the auto-focus was interfering with the “Skip To” linking functionality. Note that pages with a specific need for auto-focus, such as the login screen where the cursor focuses on the username and barcode field, have not been altered.

**NEW – Manage Items**

New functionality allows authorized library staff to view a high-level display of items associated with a bibliographic record and a centralized location for completing item management tasks. The default item view includes Barcode, Library, Branch/Location, Collection, Call Number, and Status of each item.

**NEW – Catalog Maintenance**

New functionality allows authorized library staff to perform a staff-centric search of bibliographic records and items in the catalog. Staff can now conduct maintenance directly from the search results, including editing bibliographic records, adding items, and managing items. A new single-search box allows searching by Title and/or Author, standard identifiers (e.g. ISBN, ISSN, LCCN), AGCN, barcode, and item call number. It supports wildcard character "\*". The default scope is set to “All Libraries” with an option to refine the search to specific library collections.

Search results will display with the following features:

- (1) If your library owns a copy of the title, an icon will be shown.
- (2) Based on user permissions, the menu offers actions such as Edit Bib Record, Add Item, Manage Items, Go to Full Record.
